

To remove the new Blogger/Google Blogger Beta Navbar, simply add this code between the <head> and </head> tags of your blogs html;

```
<style type="text/css">
#navbar-iframe {
  height:0px;
  visibility:hidden;
  display:none
}
</style>
```

So it looks like this...

```
<?xml version="1.0" encoding="UTF-8" ?>
<!DOCTYPE html PUBLIC "-//W3C//DTD XHTML 1.0 Strict//EN"
"http://www.w3.org/TR/xhtml1/DTD/xhtml1-strict.dtd">
<html xmlns='http://www.w3.org/1999/xhtml'
xmlns:b='http://www.google.com/2005/gml/b'
xmlns:data='http://www.google.com/2005/gml/data'
xmlns:expr='http://www.google.com/2005/gml/expr'>
  <head> <style type='text/css'>
#navbar-iframe {
  height:0px;
  visibility:hidden;
  display:none
}
</style>
  <title> <data:blog.pageTitle/> </title>
  <b:include data='blog' name='all-head-content'/>
  <b:skin> <![CDATA[/*
