To embed your audio or movie into Blogger just change the red text for your link location.

```
<embed src="http://bling4yrblog.podomatic.com/enclosure/2007-09-10T05_37_36-07_00.mp3" autostart="false" loop="false" controls="console" height="90" width="200"></embed>
```

It would be fun to share your successful audio link through the comments section.
